

Regal Angel Fish (*Pygoplites diacanthus* AngelFish)

Description: My amazing Dicanathus!, Got him as a juvi!, eating my corals right off the bat, now he has quit and is munching on prepeard and frozen foods :)

BlueSpot Jawfish (*Opistognathus rosenblatti* Jawfish)

Description: New to my tank, but has already established many homes in my tank, eats mysis and is an amazing addition to my aquaria!

Purple Tang (*Zebrasoma xanthurus* Tangs)

Description: A redsea purple tang, net caught, and an amazing specimen, I love his color!

Yellow Tang (*Zebrasoma flavescens* Tangs)

Description: A yellow tang, one of the more common fish in home aquaria yet one of the more fascinating.

Tomini Tang (*Ctenochaetus tominiensis* Tangs)

Description: A cute little tang, mostly grazes the rocks, harmless yet sweet.

Black & White Percula (Pair) (*Amphiprion ocellaris* Clowns)

Description: How long have I waited for this pair! An Australian origin, home grown true pair!

Multicolor Angel (*Centropyge multicolor* Angelfish)

Description: An amazing relatively rare fish. Got it through a friend, Love him!!!
