

Untitled_thumb

Protein Skimmer

Description: The new SC 2060 Deltec skimmer, Da Bomb!!!!

Lighting

Description: ATI SunLight T5 6x39 watt, Exactly the right lighting for all my LPS needs :)

Return Pump

Description: Reef Octopus Bubble Blaster 5000. An amazing return pump, low wattage and no heat :)

Water Movement

Description: Ecotech Marine 2x Vortech MP40w, after years of using Tunze pumps I upgraded to these bad boys. And I never look back :D

Heating

Description: Newatt 2x Polymer 200 watt. I chose these heaters because they are fairly short and they aren't made of glass. I once had a glass heater shatter in my sump, don't wanna have to go through that again :(
